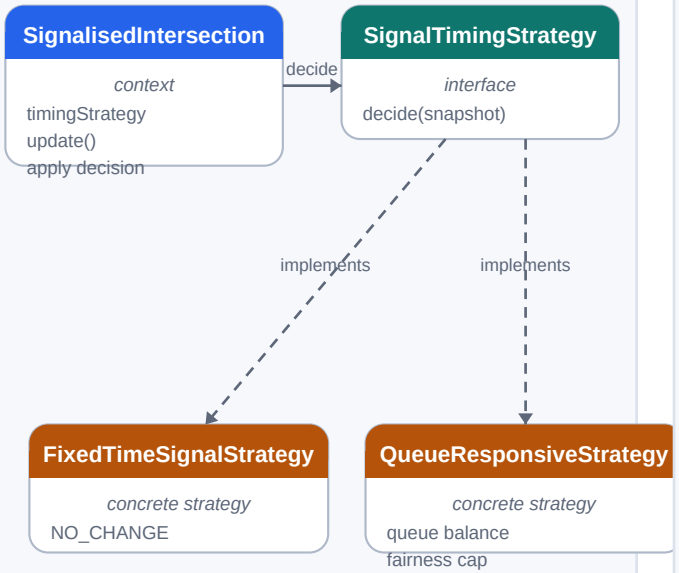
Traffic Simulation - Design Pattern Map

COMP2000 Assignment 2 | Strategy, State and Observer implementations

1 Strategy

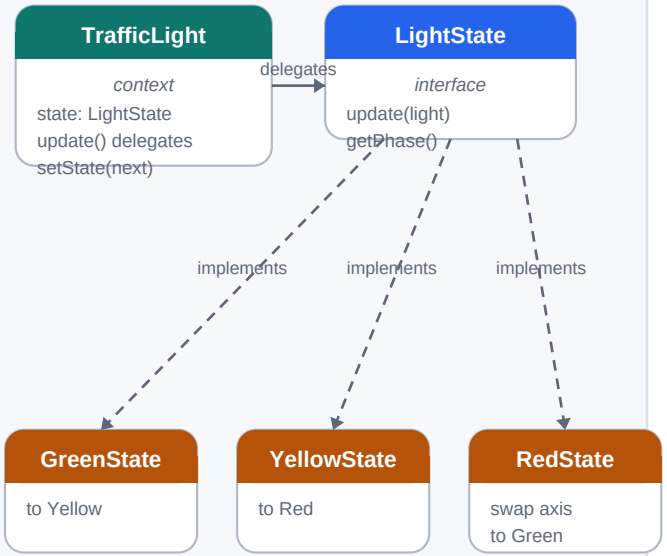
Interchangeable signal timing policies



Runtime selection: T key or --signals=fixed|adaptive

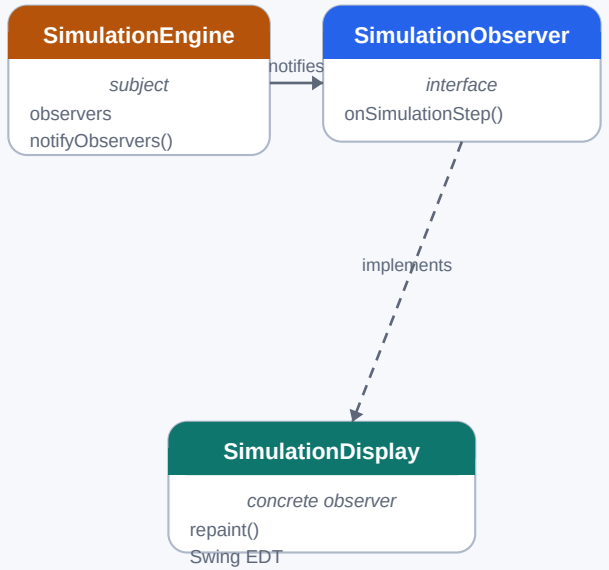
2 State

Phase-specific transitions without a switch



3 Observer

Engine publishes complete ticks to the view



Network lock completes an atomic tick before notification.

Branch: assignment-2-development | All implementations use standard JRE classes only

Solid arrows: calls/delegation Dashed arrows: implementation
